#### **Overview**

What is a 9 volt solar panel?

WSL Solar's 9V solar panels (or 9 volt solar panels) are built with the latest most efficient crystalline silicon solar cells. These custom shaped solar panels are great for charging your 6V DC batteries and ideal for use in off grid appli.

What are custom shaped solar panels?

These custom shaped solar panels are great for charging your 6V DC batteries and ideal for use in off grid applications such as marine buoys, traffic signs, loT devices, GPS trackings, educational kits, small electronic devices, LED lighting etc. Click here to watch the video of this type of custom solar panels.

What are new photovoltaic technologies?

Solar cell researchers at NREL and elsewhere are also pursuing many new photovoltaic technologies—such as solar cells made from organic materials, quantum dots, and hybrid organic-inorganic materials (also known as perovskites). These next-generation technologies may offer lower costs, greater ease of manufacture, or other benefits.

What is a third type of photovoltaic technology?

A third type of photovoltaic technology is named after the elements that compose them. III-V solar cells are mainly constructed from elements in Group III—e.g., gallium and indium—and Group V—e.g., arsenic and antimony—of the periodic table. These solar cells are generally much more expensive to manufacture than other technologies.

What is photovoltaic research?

Photovoltaic research is more than just making a high-efficiency, low-cost solar cell. Homeowners and businesses must be confident that the solar panels they install will not degrade in performance and will continue to reliably generate electricity for many years.
