#### **Overview**

What is a PV AC combiner box?

The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

What is a solar combination box?

A Solar Combiner Box is an essential electrical device used in photovoltaic (PV) power generation systems. Its primary function is to combine the output currents of multiple solar panel strings (PV strings) into a single output, which is then sent to the inverter for DC to AC conversion.

What is a solar combiner box & junction box?

A solar combiner box and a junction box serve distinct purposes in a photovoltaic system. The combiner box consolidates electrical outputs from multiple solar panel strings into a single output. It includes protective components like fuses, circuit breakers, and surge protection devices.

Why should you choose LS solar combiner boxes?

As developed based on customers' needs, LS's PV combiner boxes provide optimum connections and protections from the modules to the inverters. High reliability and safety. Optimized for solar power plants. The enclosure was made of metal (SS304) to increase durability. It is designed based on the latest IEC standards and has been certified as CB.

How do I choose a solar combiner box?

Investing in certified equipment ensures peace of mind and long-term reliability for your solar system. Compatibility with system components is another critical factor when selecting a solar combiner box. The box must

integrate seamlessly with your photovoltaic system to ensure optimal performance and reliability.

How does a solar combiner box work?

If every string were wired directly to the inverter, it would result in complex cabling, higher costs, and increased risk of electrical faults. The solar combiner box solves this problem by consolidating the current from all strings into one streamlined output.
