Bandar Seri Begawan Distributed Wind Power Generation System

Overview

Can natural wind energy be used in Brunei Darussalam?

Conventional power generation mainly depends on natural gas and diesel oil in Brunei Darussalam. The power utility company is now thinking of power generation using natural wind. In this paper, wind energy, being one of the most readily available renewable energy sources, was studied.

What is Weibull distribution based on in Brunei Darussalam?

The wind characteristic, velocity and directions were studied using Weibull distribution based on the measurement of wind speed at two different locations in Brunei Darussalam. These wind speed distributions were modeled using the Wind Power program.

Who generates electricity in Brunei Darussalam?

Electrical power in Brunei Darussalam is generated by the Department of Electrical Services (DES) under the Brunei Government and by a private company "Brunei Power Management Company (BPMC)". DES has four generating power plants in operation with total installed capacity of approximately 242.5 MW.

Who is Berakas Power Company Sdn Bhd (BPC)?

3) Berakas Power Company Sdn Bhd (BPC) The BPC was established as a private enterprise in 1999. It operates the generation, transmission, and distribution network to the end users in Bruneis central area, where Bandar Seri Begawan (BSB) is located and supplies approximately 40% of the national electric power demand.

What is the power system in Brunei Darussalam?

There are two power systems in Brunei Darussalam, as mentioned. The DES power system covers the whole country, supervises Temburong district, and comprises four power stations and transmission lines at 275 kV, 132 kV, and

66 kV. However, the current maximum operating voltage is 66 kV.

What is the wind speed of Brunei Darussalam?

Based on this analysis, it has been found that the wind speed of 3 to 5 m/s has a probability of occurrence of 40%. Besides, the annual energy production at a wind speed of 5 m/s has been found to be in the range between 1000 and 1500 kWh for both the locations in Brunei Darussalam.
