Base station maintenance and battery replacement

Overview

Do I need to replace my base station's batteries?

If you're not certain which system you have, see the Which Version of the SimpliSafe® System Do I Have article. You will likely never need to replace your Base Station's batteries as they are rechargeable and meant to last. The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries.

How do I replace a base station?

To replace a base station, remove the old Base Station (including the batteries and power adapter) and return it to SimpliSafe using the enclosed, pre-paid USPS mailing label. Then, plug the new Base Station into the power outlet. Your existing sensors should already be pre-programmed in this replacement system.

How many batteries does the base station take?

The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries. Regular alkaline batteries should never be inserted into the Base Station, as they may damage the device. Once you have acquired the necessary NiMH rechargeable batteries, you can follow the steps below to replace them:

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO4) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular

structure simplifies installation, maintenance, and scalability.

How do you protect a telecom base station?

Backup power systems in telecom base stations often operate for extended periods, making thermal management critical. Key suggestions include: Cooling System: Install fans or heat sinks inside the battery pack to ensure efficient heat dissipation.
