Battery cabinet connector

Overview

What is a battery connector?

Battery connectors have colour-coded housings and mechanical keys to prevent two different voltage colour-coded housings from mating. The battery terminals are designed to fit either positive or negative battery posts. They're end-to-end stackable with contacts made from various metals and they offer a high cycle life.

Which connectors are suitable for a battery inverter?

Connector, color: black, number of positions: 1, rated voltage: 1500, rated current: 300 A, Connection method: Crimp, Contact connection type: Socket, min. cable diameter: 15.1 mm, max. cable diameter: 19.4 mm The new connectors for residential storage applications are particularly suitable for use on battery inverters.

Are busbar connections and battery-pole connectors safe and cost-effective?

Busbar connections and battery-pole connectors for battery storage systems are safe and cost-effective. Find out more here in the video. Here you will see how you can install energy storage systems quickly and easily using battery-pole connectors and busbar connections from Phoenix Contact.

What is a BPC connector?

The BPC series connector that is protected against polarity reversal is ideal for use in energy storage units. Rotatable and featuring touch-proof contacts and mechanical coding, the single-position connector provides a particularly high level of flexibility and safety when connecting battery modules.

Why do we need special connection technology for battery storage systems?

Special connection technology optimized for use in storage systems is required in order to connect these storage systems quickly, safely, and efficiently. Busbar connections and battery-pole connectors for battery

storage systems are safe and cost-effective. Find out more here in the video.

What is a single-position connector?

Rotatable and featuring touch-proof contacts and mechanical coding, the single-position connector provides a particularly high level of flexibility and safety when connecting battery modules. Would you like to test our connection solutions for energy storage?
