Battery cabinet installation battery module process

Overview

How do you connect a battery to a cabinet?

Route the ground bond wiring from the battery cabinet's ground bond bolt, through the cabinet-to-cabinet wiring pass through to the adjacent cabinet's ground bond bolt. 9. Connect the ground bonding wiring to the bolt and torque the ground bond wiring bolts to 10 Nm (7.38 lb-ft).

How do I wire the Eaton Samsung Gen 3 battery cabinets?

Only one ground conductor is required in each conduit. Use this procedure to wire the Eaton Samsung Gen 3 Battery Cabinets to the UPS cabinet. To install wiring to connections: Verify the UPS system is turned off and all power sources are removed. Refer to the applicable UPS Installation and Operation manual for UPS operating procedures.

How do I wire a UPS battery?

Refer to the battery cabinet manual for detailed instructions on conduit and battery wiring locations. Route the battery wiring (positive, negative, and ground) through the conduit from the DC terminals in the UPS over to the DC terminals located in the top of the battery cabinet.

How many battery modules does a ups have?

The System is housed in a one or two free-standing cabinets with safety shields behind the door and front panels. The UPS is available in 50 or 60 Hz with various output power ratings while the battery cabinet is available with 16 battery modules. The table below depicts the system model numbers and the stored energy capacity of the system.

What are the maintenance procedures for a UPS & battery system?

Maintenance procedures should specify that the bolted connections be retorqued to values listed in this manual. Annual preventive maintenance should be performed only by authorized service personnel familiar with

maintenance and servicing of the UPS and battery system.

What is the difference between a ups and a battery cabinet?

The UPS is available in 50 or 60 Hz with various output power ratings while the battery cabinet is available with 16 battery modules. The table below depicts the system model numbers and the stored energy capacity of the system. The End of Discharge Voltage limit for each battery cabinet for all models is 400.8V DC. Table 3.
