

SolarGrid Energy Solutions

Camping power station factory in Cambodia

Overview

Why did Cambodia add a 200 MW power station in Phnom Penh?

One of the ways Cambodia's national utility, Electricité du Cambodge (EDC), sought to increase flexibility was by adding a 200-MW power station in Phnom Penh, the nation's capital. In August 2019, MAN Energy Solutions and China National Heavy Machinery Corp. (CHMC) were jointly awarded a contract to build the facility.

What are the main sources of electricity in Cambodia?

Major sources of local power generation are hydro and coal, and minor sources include diesel, wood, and biomass. In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season.

Why do Cambodians need diesel generators?

There is tremendous demand in Cambodia for diesel generators as backup power, on-site power plants, and power generation in rural areas not served by public utilities.

How much money does Cambodia need to build a power plant?

The Cambodian government has stated in its PDP that it will need \$9 billion of investment to develop new power plants and expand the national grid, of which \$2.5 billion has been approved between 2022 and 2025. Opportunities exist for power generation and transmission equipment.

Where does Cambodia import electricity from?

In 2015 Cambodia imported electricity from Vietnam (277 MW), Thailand (135.5 MW) and Laos (4 MW). 11 The Vietnamese electricity is carried through high voltage lines to Phnom Penh; that from Thailand is goes through Banteay Meanchey, Battambang and Siem Reap lines. The import from Laos supplies the Steung Treng area.

Does Cambodia buy electricity from neighboring countries?

In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season. In 2022, Cambodia's total installed capacity amounted to 4,495 megawatts (MW), while 1,030 MW of power was imported from Thailand, Vietnam, and Laos.
