Credit for energy storage projects

Overview

The U.S. energy storage sector is expected to continue expanding after the enactment of the FY2025 Budget Act, which secures Investment Tax Credit (ITC) eligibility for storage projects commencing construction through the end of 2033. Who can claim energy storage credits?

Taxpayers with a qualified facility and energy storage technology placed in service after Dec. 31, 2024 may claim the credit. Elective payment and transfer of credits may be available to certain applicable entities to include taxexempt organizations and government entities.

What is the clean electricity investment credit?

The Clean Electricity Investment Credit is a newly established, tech-neutral investment tax credit that replaces the Energy Investment Tax Credit once it phases out at the end of 2024. This is an emissions-based incentive that is neutral and flexible between clean electricity technologies.

Do energy storage projects qualify for a new ITC?

Energy storage projects placed in service after Dec. 31, 2022, that satisfy a new domestic content requirement will be entitled to a 10% additional ITC (2% for base credit).

What is the ITC rate for energy storage projects?

Energy storage installations that begin construction after Dec. 31, 2024, will be entitled to credits under the technology-neutral ITC under new Section 48E (discussed below). The base ITC rate for energy storage projects is 6% and the bonus rate is 30%.

Is energy storage eligible for the IRA ITC?

Standalone energy storage is not eligible for this credit, but energy storage installed in connection with wind and solar projects may be eligible. In addition to all the changes for the ITC, the IRA also revised the Section 25D credit

homeowners use for residential energy storage projects, such as batteries.

When does the clean electricity investment credit phase-out start?

The credit is available to taxpayers with a qualified facility and energy storage technology placed in service after Dec. 31, 2024. The Clean Electricity Investment Credit phase-out starts for the later of 2032 or when U.S. greenhouse gas emissions from electricity are 25% of 2022 emissions or lower.
