Does the battery cabinet in the computer room have to be in a single room

Overview

Do battery cabinets need to be in a battery room?

Because cabinets can have locked doors, the cabinets do not have to be in battery rooms; they can be installed directly adjacent to the UPS system and/or the information technology equipment. This eliminates the need for long dc cabling. Battery cabinets can be made to be indistinguishable from IT equipment cabinets.

Does a battery room cover maintenance free or computer room type batteries?

It does not cover maintenance free or computer room type batteries and battery cabinets. Main keywords for this article are Battery Room Design Requirements, vented lead acid batteries, battery room safety requirements, Battery Room Ventilation, unit substations electrical. Batteries can be hazardous to both personnel and equipment.

Can VRLA cabinets be installed in a battery room?

Battery cabinets - Only VRLA can be installed in cabinets. Because cabinets can have locked doors, the cabinets do not have to be in battery rooms; they can be installed directly adjacent to the UPS system and/or the information technology equipment. This eliminates the need for long dc cabling.

Should batteries be in a separate room?

Battery rooms are considered hazardous (classified). So you'll need provisions for class I div II at minimum. read over article 500-504. If it is broken, fix it. If it isn't broken, I'll soon fix that. I don't believe there is an NEC requirement that batteries be in a separate room.

What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is

where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

How should a battery room be located?

This will reduce the cost and exposure of the dc distribution system. The battery room shall be located in a way that provides access for lifting equipment to be used during initial installation and future maintenance operations. The location shall be as free from vibration as practical.
