EMS for installing communication base station on small roof

Overview

Can a radio base station be installed on a rooftop?

3. For the installation of a radio base station, the operators are reminded to consider the possible effect of radio-frequency radiation on flammable atmospheres due to the diesel fuel oil tank, if any, installed on the proposed rooftop.

What is a telecommunications system (radio base station)?

A telecommunications system (radio base station) may comprise an equipment room/shelter which is a structure for housing power supply and transmission equipment and/or antennae which are fixed to roof parapet of a building or attached to supporting frames projecting from the external wall of a building. 2.

Can a radio base station be installed within a building?

The proposed radio base station installation within building is certified to constitute material change in use which necessitates submission of notification to the Building Authority under BO s25.

Can a base station be installed in a residential flat?

the antennas of the base station are not installed within a residential flat in a residential or residential/commercial building.

What is a radio base station reconfiguration procedure?

This procedure outlines the application procedure to be followed by the mobile services operators (hereinafter called the "operators") for the reconfiguration of existing radio base stations NOT involving changes in the structural design and planning perspective of the parent building, and the change of land use.

How will OFTA assess a radio base station application?

5. To ascertain that the proposed radio base station would not cause harmful radio interference with other telecommunications systems or services and would not pose any unacceptable non-ionization radiation hazards to personnel or residents in the vicinity, OFTA will assess the application based on the information provided in Annex 1 to Part B. 6.
