#### **Overview**

How will energy storage impact New York?

Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage. All of this while creating an industry that could employ at least 30,000 New Yorkers by 2030.

How big is energy storage in New York State?

Nonetheless, energy storage accounts for only about 2% of total U.S. energy capacity.36 FOTM systems have driven the bulk of this growth in installed ESS capacity. Under the Climate Leadership and Community Protection Act (CLCPA) passed in 2019, New York State (the State) established an ambitious goal for energy storage of 3 gigawatts by 2030.

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.

What are common energy storage technologies in industrial parks?

Common energy storage technology in industrial parks. Schematic diagram of power-power hybrid energy storage. Typical framework of cooling-heating-

power hybrid energy storage system . Schematic diagram of a power-cooling/heating-gas hybrid storage system. Typical framework of a hybrid power-gas storage system .

Can energy storage be used in industrial parks?

Energy storage has been widely used in industrial parks, but the role of a single energy storage technology in such industrial parks' is limited and cannot meet the full needs of energy storage .
