

#### **SolarGrid Energy Solutions**

# **Energy storage cabinet has lithium iron phosphate battery**

#### **Overview**

It features robust lithium iron phosphate (LiFePO4) batteries with scalable capacities, supporting on-grid and off-grid configurations for reliable energy storage solutions. Are lithium iron phosphate batteries the future of solar energy storage?

Let's explore the many reasons that lithium iron phosphate batteries are the future of solar energy storage. Battery Life. Lithium iron phosphate batteries have a lifecycle two to four times longer than lithium-ion. This is in part because the lithium iron phosphate option is more stable at high temperatures, so they are resilient to over charging.

Why should you use a battery energy storage system?

Shave offload peaks for your commercial or industrial business with reliable battery energy storage systems. Store excess energy from your solar panels to increase PV self-consumption and decrease dependence on the expensive grid for an efficient power storage system.

What is his-energy's premium Battery Cabinet?

HIS-Energy's Premium Battery Cabinet Solution: Engineered for Both Outdoor (IP54 Rated) and Indoor Installations. From peak shaving and emergency power supply to powering EV charging stations, our smart HIS- EMS seamlessly manages your energy needs.

What is lithium iron phosphate (LFP)?

Lithium Iron Phosphate (LFP) is currently the best solution for storing energy, because of its durability, its high safety and its technical superiority compared to other technologies on the market. PowerRack system uses our BMSMatrix Technology to handle various combinations of ESS configuration.

How long does a lithium phosphate cell last?

Cells with up to 12,000 cycles.
 Lifespan of over 5 years; payback within 3

years. • Intelligent Liquid Cooling, maintaining a temperature difference of less than 2°C within the pack, increasing system lifespan by 30%. • High-stability lithium iron phosphate cells. • Three-level fire protection linkage of Pack+system+water (optional).

Does his-energy offer a turnkey battery storage solution?

At HIS-Energy our aim is to deliver our clients with fully integrated turnkey battery storage solutions. HISbatt 215-A comes with an integrated cooling system (HVAC), a fire suppression system, and a power inverter installed with the safest LFP battery cells.
