Overview

Classified by materials used, energy storage containers can be divided into three types: 1. Aluminum alloy energy storage container: the advantages are light weight, beautiful appearance, corrosion resistance, good elasticity, convenient processing, low processing and repair costs, and.

 Battery compartment: The battery compartment mainly includes batteries, battery racks, BMS control cabinets, heptafluoropropane fire extinguishing cabinets, cooling air.

Take the 1MW/1MWh energy storage container system as an example. The system generally consists of an energy storage battery system, a monitoring system, a battery.

Customers purchasing lithium ion battery storagesystems will intensify their demand for energy and electricity as energy storage systems move to longer durations. Lithium battery.

• Energy storage container has good anti-corrosion, fire-proof, waterproof, dust-proof (wind and sand), shock-proof, anti-ultraviolet, anti-theft.
