#### **Overview**

Are flywheel energy storage systems environmentally friendly?

Flywheel energy storage systems (FESS) are considered environmentally friendly short-term energy storage solutions due to their capacity for rapid and efficient energy storage and release, high power density, and long-term lifespan. These attributes make FESS suitable for integration into power systems in a wide range of applications.

Can a hybrid charging station with flywheel improve power smoothing?

In , a electrical vehicle (EV) charging station equipped with FESS and photovoltaic energy source is investigated, and the results shows that a hybrid system with flywheel can be almost as high-efficient in power smoothing as a system with other energy storage system.

Can flywheel energy storage system array improve power system performance?

Moreover, flywheel energy storage system array (FESA) is a potential and promising alternative to other forms of ESS in power system applications for improving power system efficiency, stability and security . However, control systems of PV-FESS, WT-FESS and FESA are crucial to guarantee the FESS performance.

How can Fiji achieve a reliable and affordable power supply?

To achieve the goal of providing reliable and affordable power supply for whole Fiji and to deliver climate agenda, a large investment effort for all the subareas generation expansion, transmission and distribution reinforcement has to be taken. Scenario-1: comprises of all hydro power plant proposals which are expected to be commissioned by 2031.

Is pumped hydro a viable option in Fiji?

For longer term storage (greater than eight hours) pumped hydro remains the

only viable technology (Arena, 2018) and also on-grid solar PV installations are slowly gaining popularity in Fiji. Distributed solar PV systems work well with pumped storage.

Does fiji16 need geothermal power?

Fiji16 is one of that, which can meet the energy needs by geothermal generation. In context of this, World Bank has also agreed to provide technical assistance to identify 2-3 major sites for geothermal-based power generation in Fiji (IRENA, 2015).
