# **Georgetown Energy Storage Transformation**

### **Overview**

Will Georgetown Energy Partners reduce energy use by 35 percent by 2031?

Georgetown Energy Partners anticipates that the projects it undertakes will reduce overall energy-use intensity by 35 percent by 2031. Expertise and expanded capabilities provided by the partnership will support more sustainable energy and water efficiency projects on campus and provide long-lasting environmental benefits for years to come.

How can Georgetown University improve its sustainability efforts?

Georgetown University strives to lead by example – embarking on bold projects that demonstrate how universities can enhance their sustainability efforts. Georgetown Energy Partners anticipates that the projects it undertakes will reduce overall energy-use intensity by 35 percent by 2031.

How big is Georgetown University's energy infrastructure?

Big. Georgetown University's energy infrastructure delivers 123,202,860 kilowatts of electricity and 805,453 MBtus of natural gas annually. Balanced. The university owns the energy infrastructure and retains control over capital improvement decisions.

What is Georgetown Energy Partners?

Georgetown Energy Partners is a partnership entity formed by ENGIE North America and Axium Infrastructure to operate and improve campus energy systems at Georgetown University. The 50-year partnership with the University is the latest in a series of collaborations between ENGIE North America and Axium Infrastructure, which began in 2017.
