HTC base station does not respond when plugged into power source

Overview

Why is my HTC Vive led off?

Off: The LED for your HTC Vive will be off when no power is being supplied to the headset. If your HTC Vive's base stations are failing to track your accessories, try to identify the state of your base stations. Each base station has a LED at the top of the glass front panel.

Why is my base station not turning on?

Hi, If the base station is not turning on when power is connected to either the DC-In jack or the mini USB port then there is a problem with the power supply circuit on the motherboard.

How do HTC Vive base stations work?

The HTC Vive base stations operate on various channels, which the hardware uses to determine the sync method. Each base station's channel can be changed by using a button on the back of the device. Each base station also contains a spinning motor, which is used to emit infra-red light.

Why is my Vive base station not working?

If the LED on the Vive base station is not lit up, that means the base station is not receiving power. If the base station is plugged into an outlet but not powering on, try a different outlet. Issues can occur with your base station while trying to sync. Here are some tips to make sure they are set up properly for optical sync.

How to fix HTC Vive not turning on?

Here's what you can do to fix your HTC Vive that does not turn on: The official support page of HTC Vive listed how to turn on and fix your VR headset. The first thing you need to do is the open your SteamVR app from your PC. Also, make sure that the base stations are turned on, and your headset is connected to your PC through the link box.

Why is my HTC Vive controller blinking red?

When low on charge, the HTC Vive controllers will lose their ability to consistently connect to the headset. If your controller's LEDs fail to light up or are blinking red, it's likely they're in need of a recharge. Plug your HTC Vive controllers into the supplied wall adapters, via the micro-USB port on the bottom of the controller body.
