# How big a battery should I use with a 21 volt 60 watt solar panel

#### **Overview**

The standard size for a solar battery is 10 kilowatt-hours (kWh). This size is best for homeowners who want solar to lessen their dependence on the public power grid and cut energy costs. How do I choose the best solar battery size?

Find the ideal solar battery size for your energy needs. Enter your daily energy consumption, backup requirements, and solar system details to determine the best battery size in kilowatt-hours or ampere-hours. Choosing the right solar battery size is essential for ensuring reliable backup power and efficient energy storage.

What size solar battery do I Need?

The size of the solar battery you need will depend on the size of your home — specifically, how many bedrooms it has. To work out what size battery you'll need, you can start by calculating your electricity usage. Look at either your smart meter or your monthly energy bill, which will tell you how much you use on average.

What is a solar panel and Battery sizing calculator?

A Solar Panel and Battery Sizing Calculator is an invaluable tool designed to help you determine the optimal size of solar panels and batteries required to meet your energy needs. By inputting specific details about your energy consumption, this calculator provides tailored insights into the solar setup that will best suit your requirements.
