

SolarGrid Energy Solutions

Huawei ASEAN dedicated energy storage battery

Overview

Huawei and Keppel have signed a Memorandum of Understanding (MoU) to develop solar and battery energy storage system (BESS) projects for the data center and other high-energy-consuming sectors, initially focusing on the ASEAN region. Why is Huawei reshaping the future of Energy Innovation?

By leveraging Huawei's cutting-edge digital power technologies and Keppel's expertise in energy management, we are not only meeting the growing demand for renewable energy to support Singapore's global leading position in green development – we are reshaping the future of energy innovation.

How will Huawei & Keppel work together?

Through this partnership, we will harness Huawei's digital power technologies and Keppel's deep expertise in energy infrastructure to enhance the reliability and seamless integration of renewables with state-of-the-art energy storage.

What will the ASEAN & ASEAN collaboration look like?

The collaboration will see both companies jointly explore designing and developing solutions such as interconnected power grids across the ASEAN region, low-carbon data centres and industrial parks, and digital energy management for hybrid energy systems.

How will Huawei & Keppel collaborate on a demand response programme?

As well, in Singapore, both parties are collaborating on a demand response programme using a BESS developed at Keppel Infrastructure @ Changi. The BESS will allow Huawei and Keppel to further explore novel smart operations and maintenance solutions to enhance the reliability, performance and efficiency of renewable energy assets.

What will Huawei and Keppel do with the Bess?

"The Bess will allow Huawei and Keppel to further explore novel smart operations and maintenance solutions to enhance the reliability, performance

and efficiency of renewable energy assets," said the companies, adding that they will co-develop go-to-market strategies beyond Singapore.
