Huawei power storage vehicle customization

Overview

Why is Huawei launching a smart automotive solution business unit?

To enable this seismic shift in transportation, Huawei launched its Intelligent Automotive Solution business unit in May 2019. We invest about US\$1 billion annually in research and development related to autonomous driving technologies. Autonomous vehicles will produce broad social benefits:

Why is Huawei developing a solid-state battery?

Huawei's design aims to boost safety and cycle life by mitigating degradation at this critical junction. Huawei's involvement in solid-state battery research reflects a broader trend among Chinese technology and automotive companies. While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials.

What is Huawei's advanced driving system?

Huawei provides smart components and systems for autonomous vehicles, helping manufacturers produce cars that are better, safer, and cleaner. Click here to learn about the capabilities of Huawei's Advanced Driving System. See how Huawei researches new technologies that are fundamentally changing driving:.

Does Huawei make power batteries?

While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials. Earlier in 2025, the company filed a separate patent on the synthesis of sulfide electrolytes — a key material known for its high conductivity but also high cost, sometimes exceeding the price of gold.

Does Huawei have a 3,000-kilometre range and 5-minute charging range?

While Huawei's claims of a 3,000-kilometre range and five-minute charging have generated widespread attention, experts warn that such figures remain

theoretical and would require charging infrastructure that is not yet commercially available.
