Independent new energy storage

Overview

Are independent energy storage stations a good investment?

This does not augur well for the market in terms of long-term competition. There will be safety risks associated with excessive cost control and an indifference to quality. Independent energy storage stations enjoy good long-term prospects, though this segment is sluggish in the short term.

Is energy storage profitable?

Energy storage is mainly used in three major application scenarios: the power generation side, the grid side, and the user side. Currently, energy storage stations on the user side are relatively profitable, while the profit margins for the power generation side and the grid side are limited.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Why is new energy storage important in China?

SINGAPORE (ICIS)-New energy storage plays a crucial role in ensuring power balance in China, especially in effectively addressing the intermittent issues of new energy generation. It helps alleviate the dual pressures of power supply security and consumption.

How much money did energy storage companies raise in 2022?

In 2022, they accounted for 90% of global energy storage-related fundraising deals (China for 46%, the US for 31%, and Europe for 13% respectively), raising USD 2.9 billion, USD 2 billion, and USD 800 million, respectively (Figure.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.
