Is charging an outdoor power supply considered a high-power appliance

Overview

Which electrical appliances should be connected to a single socket outlet?

An electrical appliance with high power consumption (e.g. air-conditioner, dehumidifier, electric heater, electric water kettle/pot, electric rice cooker and washer/dryer) should receive power supply from a single fixed socket outlet to which the connection of any other appliance should be avoided.

How much clearance do I need for a modular power supply?

This will require clearance limit 1.48 times of IEC/UL 60950-1 unless your device marked as suitable for use only up to 2000 m New modular power supply has been designed to exceed regulatory safety requirements at 5000 M for creepage and clearance. The new product is fanless.

Do external power supplies need to be certified?

Per 10 CFR 430.32 (w) (4), external power supplies must bear an obvious and permanent marking that complies with the International Efficiency Marking Protocol for External Power Supplies. 10 CFR Part 429 sets certification requirements for products covered by 10 CFR Part 430, which includes external power supplies.

Can I use a 220V power supply in Hong Kong?

Adhere to the instructions given in its manual when using an electrical appliance. Any electrical appliance of rated voltage less than 200V a.c. (e.g. audio-video (AV) appliances rated at 110V a.c.) must not be connected directly to the 220V a.c. household power supply system in Hong Kong. Any such appliance must bear a proper warning label.

What is the maximum output voltage for a ul 1012 power supply?

Specifically, the maximum output voltage should not be more than 42.4V AC and 60V DC. UL 1012 covers general-purpose power supplies (fixed, portable, and stationary) that power products including some kinds of household

appliances and battery charger-power supply combinations.

Can I buy electrical appliances in Hong Kong?

Buy only electrical appliances which meet the local statutory safety requirements (see note 1) for use in Hong Kong. Electrical appliances which are brought outside Hong Kong may not be suitable for use under the local power supply conditions (e.g. rated voltage and frequency) and environmental conditions (e.g. temperature and humidity).
