#### **Overview**

Where is China's first large-scale lithium-sodium hybrid energy storage station located?

Baochi Energy Storage Station, China's first large-scale lithium-sodium hybrid energy storage station, starts operations in Southwest China's Yunnan Province on May 25, 2025. Photo: CCTV News China's first large-scale lithium-sodium hybrid energy storage station began operations on Sunday in Southwest China's Yunnan Province.

Why should you choose Huijue battery-powered storage?

Huijue's lithium battery-powered storage offers top performance. Suitable for grids, commercial, & industrial use, our systems integrate seamlessly & optimize renewables. High-density, long-life, & smartly managed, they boost grid stability, energy efficiency, & reduce fossil fuel reliance.

What is the energy storage demand in China?

Energy storage demand in China is without a doubt. Currently, China is carrying out the urbanization of centrality, intelligence, green and low carbon. Among them, the application of DG, smart micro-grid, EV, and the intelligent management of power grid all need energy storage, , , , .

Will China's electrochemical energy storage be the main force of power grid energy storage?

And China's electrochemical energy storage is relatively mature especially the research of VRFB is leading worldwide and is hopeful to be the main force of power grid energy storage.

Why is energy storage so important in China?

A high share of renewables increases grid volatility, necessitating greater energy storage support. As of now, China's new energy storage technologies are rapidly advancing, with lithium-ion battery storage, the most mature and

cost-effective technology, dominating at 97 percent of the market, according to CCTV News.

What is the energy storage system?

The energy storage system includes  $1\times5$  MW $\times2$  h LiB,  $1\times2$  MW $\times2$  h VRFB. And the wind power of 99 MW had been put into operation in August 2012. The system is connected with the 35 kV bus. Through intelligent control, the system stores and releases power according to the coordinating with wind power.
