# Lithium battery energy storage share

### **Overview**

North America represents a crucial market for the sodium-ion battery energy storage system market, driven by ambitious renewable energy targets and substantial investments in grid modernization initiatives. The region, comprising the United States and Canada, demonstrates a.

The United States dominates the North American market, holding approximately 65% BESS market share in 2024. The country's leadership.

The United States is projected to maintain its position as the fastest-growing market in North America, with an expected growth rate of approximately.

Europe demonstrates a strong commitment to the sodium-ion battery energy storage system market as part of its broader energy transition strategy. The region, encompassing key markets like Germany, France, the United Kingdom, and Spain, shows significant progress in developing and implementing energy storage system solutions.

Germany emerges as the largest market in Europe, commanding approximately 40% of the regional BESS market share in 2024. The country's leadership is underpinned by its ambitious renewable energy targets and comprehensive energy transition strategy (Energiewende). Germany's strong industrial base, coupled with.

By battery type, lithium-ion commanded 88.6% of the battery energy storage system market share in 2024, while Lithium Iron Phosphate (LFP) is projected to expand at a 19% CAGR through 2030. What is the market share of lithium ion & lithium iron phosphate?

By battery type, lithium-ion commanded 88.6% of the battery energy storage system market share in 2024, while Lithium Iron Phosphate (LFP) is projected to expand at a 19% CAGR through 2030.

What is the global lithium-ion battery market size?

Our premium consulting services are available for an additional fee is designed to help you gain a competitive edge. The global lithium-ion battery market size was valued at USD 107.14 billion in 2024 and is projected to grow

from USD 134.08 billion in 2025 to USD 578.20 billion by 2032, exhibiting a CAGR of 23.22% during the forecast period.

What is the market share of battery energy storage systems in 2024?

By connection type, on-grid installations held a 78% share of the battery energy storage system market in 2024; off-grid applications are the fastest-growing segment at 18.5% CAGR. By component, battery packs, and racks represented 63% revenue share in 2024; energy-management software is advancing the fastest, at 20% CAGR.

Which region dominated the lithium-ion battery market in 2024?

Asia Pacific dominated the lithium-ion battery market with a share of 54.64 in 2024. The market is expected to grow significantly due to increasing demand for electric vehicles and global inclination towards adopting renewable energy in various industries.

Does China have a lithium-ion battery market?

China poses a lucrative market for lithium-ion battery manufacturers as the country has the world's largest electric vehicle registration base. Moreover, China's regulatory landscape also indicates promising growth opportunities for the lithium-ion battery market.

How does the battery energy storage system industry work?

The battery energy storage system industry also sees commercial and industrial users leveraging storage for peak-shaving and power-quality assurance. Incentive structures differ: Germany grants investment subsidies, Japan offers capacity-market payments, and several U.S. states allow demand-response enrollment.
