N Djamena generator uninterruptible power supply BESS

Overview

What is a battery energy storage system (BESS) & an uninterruptible power supply (UPS)?

Figure 1: A simplified project single line showing both a battery energy storage system (BESS) and an uninterruptible power supply (UPS). The UPS only feeds critical loads, never losing power.

What is an uninterruptible power supply (UPS) system?

Courtesy: Affiliated Engineers Inc. Uninterruptible power supply (UPS) systems have been a familiar presence for years, known for their ability to enhance power quality and offer continuous power for critical loads. These systems typically supply power for a few minutes while the generator starts up.

Does a Bess need a separate ups?

While the BESS can start up quickly, it is not instant and there will be a brief voltage supply disruption during startup. As a precaution, the system will require a separate UPS to power sensitive or critical components, potentially including the controller for the BESS.

What are the NFPA requirements for emergency and standby power systems?

International Building Code (IBC): Following IBC 2024 Chapter 27 Section 2702.1.3, emergency or standby power systems must be installed following the guidelines outlined in the International Fire Code IFC), NFPA 70: National Electrical Code (NEC) and NFPA 111: Standard on Stored Electrical Energy Emergency and Standby Power Systems.
