#### **Overview**

What is co-locating energy storage with a wind power plant?

Co-locating energy storage with a wind power plant allows the uncertain, timevarying electric power output from wind turbines to be smoothed out, enabling reliable, dispatchable energy for local loads to the local microgrid or the larger grid.

Who provides energy storage & wind power in China?

Project engineering, procurement, and construction (EPC) was provided by Nanjing NR Electric Co., Ltd., while the project's container energy storage battery system was supplied by Gotion High-tech. This project is currently the largest combined wind power and energy storage project in China.

Can energy storage improve wind power integration?

Overall, the deployment of energy storage systems represents a promising solution to enhance wind power integration in modern power systems and drive the transition towards a more sustainable and resilient energy landscape. 4. Regulations and incentives This century's top concern now is global warming.

Why is energy storage used in wind power plants?

Different ESS features [81, 133, 134, 138]. Energy storage has been utilized in wind power plants because of its quick power response times and large energy reserves, which facilitate wind turbines to control system frequency.

Can energy storage control wind power & energy storage?

As of recently, there is not much research done on how to configure energy storage capacity and control wind power and energy storage to help with frequency regulation. Energy storage, like wind turbines, has the potential to regulate system frequency via extra differential droop control.

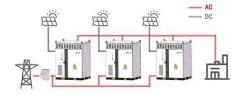

What is the largest combined wind power and energy storage project in China?

This project is currently the largest combined wind power and energy storage project in China. The Inland Plain Wind Farm Project in Mengcheng County is owned by the Anhui Branch of Huaneng International. The project has a total installed capacity of 200MW, with a paired energy storage capacity of 20% and duration of one hour.
