# New energy power battery pack

#### **Overview**

How important is a battery pack for a new energy vehicle?

For new energy vehicles, the key component that affects vehicle safety is the battery pack. As the carrier of the battery, the importance of the battery pack cannot be underestimated. The strength, rigidity, heat dissipation and waterproof of the battery pack body should meet high design requirements (Feng and Hu, 2020).

Who is new energy?

New Energy Ltd is a professional battery pack designer and manufacturer with more than 20 years of experience. We serve the industry in Europe and in the USA making innovative products with technology, enthusiasm and passion. Our core experience is based on years of operations handling Li-lon battery packs, the core of today mobile energy.

Who is extrasolar new energy?

Extrasolar New Energy is a Lithium battery, LiFePO4 battery, NCM battery, battery pack, and energy storage system manufacturer in China.

Should the new energy vehicles industry pay more attention to battery pack structures?

Comparing with traditional vehicles, the new energy vehicles industry should pay more attention to safety of power battery pack structures. The battery pack is an important barrier to protect the internal batteries.

How is the battery pack of a new energy vehicle simulated?

In this paper, the battery pack of a new energy vehicle is studied, modeled and simulated by the finite element method. Hypermesh, ANSYS and other simulation analysis software are used to analyze the static strength and dynamic modal properties.

What is a battery pack in a car?

The battery pack studied in this article is a lithium battery pack, which is located in the center of a car chassis. Its total power is 22 kWh, the battery capacity is 60 Ah, and the total voltage of the battery is 353 V.
