Nickel Strip for Lithium Battery PACK

Overview

Pure nickel strip has good gloss, ductility, solderability, conductivity and corrosion resistance. It is used as a precision conductor to transmit power to batteries or battery packs. What is a lithium ion battery pack?

LITHIUM-ION BATTERY PACK: A rechargeable lithium-ion battery pack consists of many Lithium-ion cells and a BMS. Every e-bike and electro-skateboard needs a battery pack. These pure nickel strips can be used for directly spot welding battery cells. **QUANTITY:** This package comes with 50 pieces of 2 inches (50mm) pure nickel strips.

How to choose a pure nickel strip for a battery?

PURE NICKEL AND CURRENT: Choose the correct configuration of pure nickel strip for a battery based on the current that you would like to draw. Users can increase the current rating by increasing the series connections between each parallel group or by stacking more than one layer of pure nickel strips.

How thick is a nickel strip on a battery pack?

The nickel strip on the battery packs I have is approx 0.3mm thick and is nickel-coated steel strip. It is welded 4 times per cell per side (2 weld operations, 4 indents from the spot welding pins). The diameter of the indents is approximately 1mm or perhaps 0.8mm. My current approach: The pliers look like these:.

What is a nickel strip used for?

Nickel strip is commonly used in battery building due to its ease of use in spot welding and soldering as well its high corrosion resistance over time. Nickel is magnetic at or near room temperature. **SOLDERING, WELDING AND ELECTROPLATING:** The hardness of the SHONAN pure nickel strips can be more easily spot welded and soldered.

Does nickel strip corrode?

Brief content visible, double tap to read full content. Full content visible, double tap to read brief content. 99.6% PURITY: 99.6% pure nickel strip is the material you want, the nickel strip here will never corrode and come loose after welded to a 18650 cell, lithium-ion batteries, and any other circuit systems.

Which nickel strip is best for electroplating?

Besides, 99-percent pure nickel strip can also be used for nickel electroplating, if you are hoping to achieve the bright, shiny appearance and give your projects a nice corrosion-resistant layer, the nickel strips SSPN-0015 from SHONAN.SYSTEMS is your best choice.
