# On grid hybrid solar inverter in Canberra

#### **Overview**

Are hybrid solar inverters battery ready?

Hybrid solar inverters represent a true 'battery ready' inverter setup, as described in our article on the truth about battery ready systems. But you don't have to have a hybrid inverter for a battery system. Using a method called "AC coupling", you can retrofit batteries to any existing solar system regardless of what inverter you have.

Are hybrid inverters good for Australia?

By storing excess daytime energy in their battery, they reduced grid dependence by 70%. During a storm-induced outage, their hybrid inverter switched to battery power, keeping essentials running. This shows how hybrid inverters have its good impact in Australia.

What is a hybrid inverter?

A hybrid inverter (also known as a multi-mode inverter) is capable of managing the electricity output of solar panels and charging a battery system; while also operating with mains grid supply. Given this extended capability, prices tend to be higher compared to a standard string solar inverter.

What is a hybrid inverter & how does it work in 2025?

In 2025, demand for efficient, reliable, and versatile hybrid inverters is at an all-time high. These devices convert DC electricity from solar panels into AC power for home use. It also manages energy storage systems, which allows homeowners to store excess energy for later use.

Are hybrid inverters a good choice for home solar?

As solar technology improves, hybrid inverters are now key for home solar systems. In 2025, the best hybrid inverters are efficient, reliable, and suited to Australia's energy needs. A hybrid inverter is a device that lets you use more of your solar power, save money by using less electricity from the grid, and

keep the lights on during blackouts.

Do you need a hybrid inverter for a battery system?

But you don't have to have a hybrid inverter for a battery system. Using a method called "AC coupling", you can retrofit batteries to any existing solar system regardless of what inverter you have. Our non-hybrid inverter comparison table can be found here.
