

SolarGrid Energy Solutions

Panama fully replaces photovoltaic site energy

Overview

How many solar installations are there in Panama?

According to data from the Public Services Authority (Asep), there are at least 49 solar installations in Panama that will produce 7.7% of the country's total electricity by 2024.

Why is Panama launching a solar park?

Panama formally inaugurated the Santiago Solar Park, a \$70 million investment by the Naiad Renovables Group with a capacity to produce 86,333 megawatts peak (MWP), providing a new boost to renewable energy in this country, where the photovoltaic and wind energy segments accounted for 12.9% of total electricity generation in 2024.

How many bifacial solar panels are there?

It features more than 130,000 bifacial solar panels and has generated more than 300 jobs and the planting of 15,000 native seedlings, as part of the environmental component of the renewable energy project.

Where is the 'Santiago solar' project located?

The Ministry of Commerce and Industry (MICI) reported Tuesday that the "Santiago Solar" project has a long-term contract with the Enel Group (Italy) and is located in La Mesa, Veraguas province.

Does Naiad have a long-term power purchase agreement with Enel?

Naiad Group spokesperson David Sanmartín Catalán explained, according to a statement from the Ministry of Energy and Mines (MICI) that the project was carried out with the support of local banks and has a long-term power purchase agreement with the Enel Group, which guarantees financial and operational stability for the initiative.
