# Photovoltaic curtain wall investment benefits

#### **Overview**

A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. What are the benefits of a photovoltaic curtain wall?

It also improves the aesthetic appearance of the building. A photovoltaic curtain wall has the added benefit ofgenerating electricity over the building's life. Whilst it costs a bit more than standard curtain walling, the incremental cost of a BIPV facade will typically be paid back within around five years.

What is photovoltaic curtain wall?

Photovoltaic Curtain Wall generates energy in the building implementing solar control by filtering effect, avoiding infrared and UV irradiation to the interior.

Which solar cells are used in photovoltaic curtain wall?

At present, crystalline silicon solar cells and amorphous silicon solar cells are mainly used in photovoltaic curtain wall (roofing) systems. Photovoltaic glass modules have different color effects depending on the type of product used.

What are the benefits of a curtain wall?

Standard curtain walling improves the thermal insulation of the building, leading to reduced HVAC costs and reduced heat loss. It also improves the aesthetic appearance of the building. A photovoltaic curtain wall has the added benefit of generating electricity over the building's life.

What are the physical properties of photovoltaic curtain wall (roof) system?

The physical properties of the photovoltaic curtain wall (roof) system mainly include wind pressure resistance, water tightness, air tightness, thermal performance, air sound insulation performance, in-plane deformation performance, seismic requirements, impact resistance performance, lighting performance, etc.

Can Photovoltaic Glass be mounted on a curtain wall?

Photovoltaic glasscan be mountedusing most standard curtain walling and bonded glazing systems, from suppliers such as Nvelope, Technal, Kawneer, Comar, SAPA, Reynaers, SAS, and Schüco. The standard aluminium profiles require only slight adaptation to accommodate the wiring and connectors required for solar glazing.
