Photovoltaic glass in Mauritania

Overview

Is Mauritania suitable for solar PV and wind development?

The findings of this study indicate that a significant portion of Mauritania's land area is highly suitable for solar PV and wind development, with a maximum development potential of approximately 457.9 gigawatts (GW) and 47 GW for solar PV and wind projects, respectively.

How many solar panels does Mauritania produce a year?

The facility is responsible for 10% of Mauritania's grid capacity. It generates 25,409 megawatt-hours of renewable electricity per year and displaces approximately 21,225 tons of CO2. The plant's almost 30,000 solar panels, manufactured by Masdar PV, provide electricity to more than 10,000 houses in Nouakchott.

Where is the Sheikh Zayed solar power plant located?

The Sheikh Zayed Solar Power Plant in Nouakchott, the capital of the Islamic Republic of Mauritania, is a 15-megawatt solar installation. It is one of Africa's largest solar power facilities and the country's first utility-scale facility. The facility is responsible for 10% of Mauritania's grid capacity.

How many solar panels are there in Nouakchott?

The plant's almost 30,000 solar panels, manufactured by Masdar PV, provide electricity to more than 10,000 houses in Nouakchott. The plant has produced more energy than expected, resulting in significant savings and accounting for an annual increase in demand.

What is Masdar doing in Mauritania?

The power plant is one of numerous worldwide initiatives supported by Masdar. Mauritanian utility (SOMELEC) issued a request for proposals, and the Vergnet-ABC Diesel pool was chosen to deliver the hybrid power plant project in Mauritania. It will be the first of its kind in the sub-region of West Africa.
