Photovoltaic glass installed in Bridgetown

Overview

Who is Bridgetown glass?

At Bridgetown Glass we pride ourselves in doing an excellent job on each and every project. We never skimp on quality and make every effort to maximize the value of your investment. Our past projects include both new construction and repairs/restorations. Occupied and fully operational job sites are never a problem.

What is Photovoltaic Glass?

Photovoltaic (PV) glass stands at the forefront of sustainable building technology, revolutionizing how we harness solar energy in modern architecture. This innovative material transforms ordinary windows into power-generating assets through building-integrated photovoltaics, marking a significant breakthrough in renewable energy integration.

What is ClearVue solar glass?

Their patented technology and ClearVue PV product offer the first truly clear solar glass on the market, and available to purchase now, which promises to fill cities with buildings that actively reduce energy usage while also generating electricity to contribute to building running costs.

Is Photovoltaic Glass a good investment?

Photovoltaic glass not only offsets conventional building material costs but also provides a tangible return on investment through energy generation. With an average payback time of 4 years and yearly ROIs of up to 20%, it stands as a sound economic choice.

What is a building integrated photovoltaics (BIPV) system?

Classified as a Building Integrated Photovoltaics (BIPV) system, ClearVue's solar PV windows are integrated within a building's envelope, as opposed to conventional PV systems where modules had to be mounted on the top of

existing roofs.

What is a solarvolt BIPV glass system?

EXPLORE The Solarvolt BIPV glass system replaces traditional façade cladding materials and enhances commercial building exteriors by providing sunshading, overhead glazing, CO2-free power generation and more.
