Photovoltaic off-grid inverter parameters

Overview

Can I use PV inverters in off-grid systems?

You can use the following PV inverters in off-grid systems. You can order all the listed PV inverters with preset off-grid parameters from SMA Solar Technology AG. The PV inverters must be equipped with at least the firmware version given in the table, or a higher version.

How can I order a PV inverter with preset off-grid parameters?

You can order all the listed PV inverters with preset off-grid parameters from SMA Solar Technology AG. The PV inverters must be equipped with at least the firmware version given in the table, or a higher version. If this is not the case, perform a firmware update (see PV inverter documentation).

How do I change grid-relevant parameters in the PV inverter?

To change grid-relevant parameters in the PV inverter after the first ten operating hours, you will need a special access code, the SMA Grid Guard code. The application form for this personal access code is available in the download area at , in the "Certificate" category of the respective PV inverter.

What if the SMA PV inverter is not configured for off-grid operation?

If the SMA PV inverter is not configured for off-grid operation ex works, you will need to configure the country data set of the PV inverter to stand-alone mode (see the PV inverter documentation).

Can a PV inverter be set to stand-alone mode?

The PV inverter can be set to stand-alone mode and reduce its feed-in power if this is required by the battery state of charge or the energy demand of the connected loads. To do this, use the integrated frequency-shift power control (FSPC). Selecting the PV Inverter You can use the following PV inverters in off-grid systems.

Can sunny island inverters be off-grid?

In off-grid operation, the Sunny Island inverters must be able to limit their output power, if PV inverters are connected on the AC side. This situation can occur when, for example, the battery of the Sunny Island is fully charged and the PV power available from the PV system exceeds the power requirement of the connected loads.

What Are the Important Technical Parameters of Off-Grid Inverters?

When choosing an off-grid inverter, several technical parameters are also very important, such as system voltage, output power, peak power, conversion efficiency, switching time, etc. The ...

TECHNICAL SPECIFICATIONS OF OFF-GRID SOLAR PV ...

Feb 3, 2021 · 3. Definition 3.1. Standalone solar PV power plant comprises of C-Si (Crystalline Silicon)/Thin Film Solar PV modules with intelligent Inverter with MPPT charging technology ...

Parameter identification of gridconnected photovoltaic inverter ...

Oct 24, 2019 \cdot Photovoltaic inverter is the most critical component of

photovoltaic power generation system, which plays an important role in the dynamic characteristics of th

Photovoltaic Inverters

Dec 23, 2015 · Special design inverters are available for the purposes of off-grid or hybrid systems. In most cases a powerful inverter includes charge regulator ...

Technical Information

Jun 28, 2019 · To change grid-relevant parameters in the PV inverter after ten operating hours, you will need the SMA Grid Guard code. Select a communication product corresponding to the ...
