Price of photovoltaic modules for villas in San Diego

Overview

As of August 2025, the average solar panel system costs \$2.33/W including installation in San Diego, CA. How much do solar panels cost in San Diego?

As of Oct 2024, the average cost of solar panels in San Diego is \$2.5 per watt making a typical 6000 watt (6 kW) solar system \$10,500 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt.

How much does a 5 kW solar system cost in San Diego?

In San Diego, CA, a 5 kW solar system costs \$11,800.

Are solar panels a good investment in San Diego?

Solar panels are worth it in San Diego, CA. Factors like the cost of electricity, incentives, climate, and the angle of your roof impact how quickly you'll break even on your investment compared to other areas in the U.S.

How can you reduce the cost of solar in San Diego?

Solar is a major purchase, but you can get the price tag to come down a bit by being an educated shopper. Taking advantage of incentives and rebates and shopping around for quotes can bring down your cost of solar in San Diego, CA.

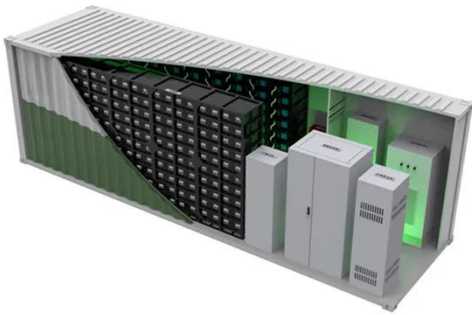

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.

Is solar expensive in San Diego?

Solar may seem expensive, but you can bring down the price tag by being an educated shopper. Taking advantage of incentives and rebates, and shopping around for quotes can help reduce your cost of solar in San Diego, CA. Additionally, if your federal tax bill is high enough, you can take advantage of the federal tax credit.
