# Repair cylindrical lithium battery

## Overview

---

How to replace a lithium ion battery?

Ensure that the replacement Lithium-ion battery has compatible voltage, capacity, and physical dimensions. Step 2: Gather the Required Tools To perform the replacement, you will need the following tools: Step 3: Prepare a Safe Workspace Create a safe and well-ventilated workspace for the Lithium-ion battery replacement.

How do you detach a lithium ion battery?

If the Lithium-ion battery has connectors, gently detach them by pulling on the connector, ensuring not to damage the wires or connectors themselves. For soldered batteries, desolder the connections using a soldering iron and desoldering wick or pump. Take extra care when handling the soldering iron to avoid burns.

What are the types of rechargeable lithium-ion batteries?

LiPol Manufacturer Supply kinds of Rechargeable lithium-ion batteries, such as Lithium-Ion Battery LP18650 (diameter 18mm, length 65mm), Lithium-Ion Battery LP26650 (diameter 26mm, length 65mm), Lithium-Ion Battery LP21700 (diameter 21mm, length 70mm).

How do you protect a lithium ion battery?

The way to avoid this is to handle and charge them correctly. Most all lithium-ion battery packs or single batteries have some kind of protection circuitry built into them to protect the cell from being overcharged, short circuited, or over discharged.

Can You revive a dead lithium ion battery?

You have your batteries, but they're dead. Now what?

All is not lost because you can revive them. If you have a balance charger

designed for charging LiPo batteries, chances are it will revive your lithium-ion cells too. Or, if you have a digital multicharger that has 'revive' functionality, that will work too.

How do you connect a lithium ion battery?

Connect the Lithium-ion battery using the appropriate method based on the previous step. If the Lithium-ion battery has connectors, align them properly and firmly push them into place. For soldered connections, solder the Lithium-ion battery leads to the designated points on the circuit board.
