Overview

What is solar photovoltaic (PV) power generation?

Solar photovoltaic (PV) power generation is the process of converting energy from the sun into electricity using solar panels. Solar panels, also called PV panels, are combined into arrays in a PV system. PV systems can also be installed in grid-connected or off-grid (stand-alone) configurations.

What is a photovoltaic system?

A photovoltaic (PV) system is composed of one or more solar panels combined with an inverter and other electrical and mechanical hardware that use energy from the Sun to generate electricity. PV systems can vary greatly in size from small rooftop or portable systems to massive utility-scale generation plants.

Where can I find information about solar photovoltaic energy?

For more information about solar photovoltaic energy, visit the following resources: Solar Photovoltaic Technology Basics (U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy) Energy Kids: Solar Photovoltaic (U.S. Energy Information Administration) Energy Saver: Using Solar Electricity at Home (U.S. Department of Energy).

What are photovoltaic panels?
