Subsidy for independent energy storage power station in Tampere Finland

Overview

Where can I find information about energy investment subsidies in Finland?

Website of Business Finland: First application round for energy investment subsidies On 4 October 2022, the Ministry of Economic Affairs and Employment made the first energy investment aid decisions under Finland's Recovery and Resilience Plan to promote clean energy solutions. Aid was granted to six projects totalling EUR 99.8 million.

What is Finland's energy subsidy scheme?

The aim of the subsidy scheme is to promote energy investment and energy infrastructure projects that are in line with the Sustainable Growth Programme for Finland and that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target.

Is energy storage a viable option in Finland?

This study reviews the status and prospects for energy storage activities in Finland. The adequacy of the reserve market products and balancing capacity in the Finnish energy system are also studied and discussed. The review shows that in recent years, there has been a notable increase in the deployment of energy storage solutions.

Is the energy system still working in Finland?

However, the energy system is still producing electricity to the national grid and DH to the Lempäälä area, while the BESSs participate in Fingrid's market for balancing the grid. Like the energy storage market, legislation related to energy storage is still developing in Finland.

Is energy storage the future of wind power generation in Finland?

Wind power generation is estimated to grow substantially in the future in Finland. Energy storage may provide the flexibility needed in the energy transition. Reserve markets are currently driving the demand for energy

storage systems. Legislative changes have improved prospects for some energy storages.

Can Business Finland grant Energy Aid?

Business Finland may grant Energy Aid to projects with investment costs of at least EUR 10,000 (energy efficiency investments) or EUR 30,000 (other energy investments, such as renewable energy or utilizing waste heat as district heat). There is no upper limit for the size of the project.

Subsidy for independent energy storage power station in Tampere

Two major solar power projects planned in Finland

Jun 15, 2023 · Ilmatar is developing two industrial-scale solar power projects in the municipality of Joroinen, Finland. With a total rated capacity of up to 230 MWp, the parks will produce the ...
