# Swedish container generator BESS

#### **Overview**

How many large-scale battery storage systems are there in Sweden?

14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region. Developer and optimiser Ingrid Capacity and energy storage owner-operator BW ESS have been working in partnership to deliver 14 large-scale BESS projects throughout Sweden's grid, situated in electricity price areas SE3 and SE4.

What is a Bess generator & how does it work?

As well as displacing the diesel generator, the BESS supports grid stability and provides black start capability to ensure rapid recovery of the power grid in the case of an outage.

How much power does a Bess system provide?

The BESS system was delivered in June, and provides 16MWh of storage, which Saft's releases say is enough for 80 minutes of backup energy with units that can provide peak power of 24MW.

Why should you choose GESS's containerized battery energy storage system?

This makes GESS's containerized battery energy storage system an ideal solution for those looking for a cost-effective and reliable way to store renewable energy. With its high supplying capacity, GESS can provide a great deal of clean energy to meet our future needs.

What is a SAFT Bess system?

Saft is a subsidiary of TotalEnergies, and the BESS system is part of a deal it signed with Microsoft in 2021 to support Microsoft's goal of removing diesels by 2030. The Saft BESS includes eight Intensium Max 20 High Energy battery containers, arranged in four groups, each with 4MWh capacity, for up to 80 minutes of backup energy.

How much power does a SAFT Bess deliver?

The Saft BESS includes eight Intensium Max 20 High Energy battery containers, arranged in four groups, each with 4MWh capacity, for up to 80 minutes of backup energy. That suggests an average power delivery of 12MW. Saft's release says the eight battery containers are each capable of delivering a peak power rating of 3MW.
