# Syria Energy Storage Power Station Hanguang Company

### **Overview**

What happened to Syria's energy infrastructure?

A Heavy Legacy of Destruction The war has left Syria's energy infrastructure in ruins. Damaged oil and gas fields, power plants, and transmission lines have exacerbated a severe electricity crisis. Losses to the electricity sector alone amount to an estimated \$40 billion, according to former regime officials.

Why is Syria rehabilitating its energy sector?

The rehabilitation of Syria's energy sector has emerged as a top priority for the Syrian Transitional Government (STG) as it works to restore essential services, stabilize the economy, and pave the way for national reconstruction.

How many solar power plants will be built in Syria?

The agreement involves building four combined-cycle gas turbine power plants with a total capacity of 4,000 megawatts, plus a 1,000-MW solar power plant in southern Syria. The Reuters Power Up newsletter provides everything you need to know about the global energy industry. Sign up here.

How will a new power supply increase Syria's electricity share?

"These additions will increase citizens' electricity share by approximately 50%," Abu Dai said, adding that work is underway to secure transmission lines for the power generated by the ships. For years, Syrians have endured electricity shortages, with daily outages lasting up to 20 hours.

Can Idlib rehabilitate Syria's energy sector?

While the areas under the former regime's control failed to rehabilitate its energy sector despite support from China, Iran, and Russia, Idlib's success in restoring electricity through its partnership with Turkey and the Green Energy Company (GEC) offers a blueprint for rebuilding Syria's energy sector.

Will Qatar help Syria rehabilitate its energy grid?

"We will determine Syria's needs in terms of infrastructure, energy, and electricity and do our best to ensure access to these basic services," Bayraktar said. Qatar has also played a vital role, providing financial and logistical assistance to Syria's efforts to rehabilitate its energy grid.
