#### **Overview**

The two battery storage facilities installed in Tonga are complementary: the aim of the first 5 MWh / 10 MW battery is to improve the electricity grid's stability (regulating the voltage and frequency), while the second 23 MWh / 7 MW battery is designed to transfer the electrical load in order to help the grid supply electricity at peak times, and notably in the evening. What is Tonga's first large scale battery energy storage system?

Tonga's first large scale Battery Energy Storage System to be built at the Popua Power Station, contributing to Tonga's 50% Renewable Energy target. Akuo Energy SAS (Akuo Energy) is a renewable energy company that develops, finances, builds and operates renewable energy power plants.

What is Popua power station - battery energy storage system?

The project was announced in 2018 and will be commissioned in 2021. The Popua Power Station – Battery Energy Storage System is being developed by Akuo Energy. The project is owned by Akuo Energy (100%). The key applications of the project are renewable energy integaration, electric energy time shift and grid support services.

What is Tonga 2?

Tonga 2 is a 3.3-hour system with 7.2MW/23.9MWh of energy, designed primarily for load shifting. They have already allowed Tonga to double its renewable energy capacity with the recent addition of 6MW in solar PV power, bringing the country's renewable mix to around 20%.
