

#### **SolarGrid Energy Solutions**

# Tunisia Household Solar Photovoltaic System

#### **Overview**

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. What is the productivity of photovoltaic systems in Tunisia?

Given these favourable conditions, the productivity of photovoltaic systems in Tunisia is very high. According to the International Renewable Energy Agency's (IRENA) Global Atlas, annual electricity production from PV systems ranges from 1,450 kWh per kilowatt peak (kWp) in the northwest to 1,830 kWh/kWp in the extreme southeast.

What are the applications of solar energy in Tunisia?

The applications of solar energy in Tunisia are diverse. Solar PV systems are increasingly installed in residential, commercial, and industrial settings to generate electricity. Large-scale solar farms, such as the Tozeur photovoltaic plant, feed into the national grid, enhancing energy availability.

Can Tunisia harness solar energy?

Abstract: Solar energy holds immense potential for Tunisia, a country blessed with abundant sunshine. With an average of over 3,000 hours of sunlight annually, Tunisia is ideally positioned to harness solar power to meet its energy demands sustainably.

Does Tunisia have solar energy?

Solar energy has great potential on the African continent. On average, Tunisia has solar resources of over 3,000 hours/year, with some regions enjoying more sunshine than others. Most regions in the south of the country have more than 3,200 hours of sunshine a year, with peaks of 3,400 hours a year in the Gulf of Gabès (south-east).

What is Tunisian Solar Program?

Tunisian Solar Programme, launched in 2005, is a joint initiative of UNEP, Tunisian National Agency for Energy Conservation, state-utility STEG and Italian Ministry for Environment, Land and Sea. The program aims to promote the development of the solar energy sector through financial and fiscal support.

How is Tunisia accelerating its energy transition?

Tunisia is accelerating its energy transition by awarding 4 solar photovoltaic projects totaling 498 MW to reduce import dependency and promote renewable energy. Faced with growing energy dependency, Tunisia is taking a decisive step forward in its commitment to renewable energy.
