Unit price of photovoltaic solar panels in the Netherlands

Overview

On average, you pay around €500 to €600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. Why are solar panels so expensive in the Netherlands?

From transportation to installation, it all goes into the price. The solar panels may become cheaper, the cost of labor in the Netherlands increases dramatically. So you may be just as expensive," says importer Peter Desmet.

How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around €500 to €600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs. Image: Freepik.

Should you install solar panels in the Netherlands?

Another reason to consider installing solar panels in the Netherlands right now is that the Dutch government will actually foot part of the bill. Currently, the Dutch government is offering a sustainable energy investment grant (ISDE) to compensate for the cost of energy-saving and sustainable installations.

What are the different types of solar panels in the Netherlands?

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels.

Monocrystalline panels are made using silicon and have an aluminium frame. These panels are more efficient in producing electricity from sunlight because of the structure of the cells.

How much does electricity cost in the Netherlands?

As of February 2024, the average cost of electricity from utility companies in the Netherlands is around \$0.4 per kWh. 3 The Dutch electricity grid is recognized as one of the most reliable globally, with a reliability level of 99.9948% reported by TU Delft, indicating that power supply interruptions are rare and typically of short duration. 4

Unit price of photovoltaic solar panels in the Netherlands

Costs and benefits Solar panels

Jun 18, 2024 · On average, you pay around EUR500 to EUR600 per solar panel, including installation. The cost of solar panels depends on the number of

What do solar panels cost in 2024?

For a roof with 10 solar panels, you pay EUR 4408 to EUR 5714 on average in 2024, which you earn back within 4 to 6 years. What your exact investment and payback period are, depend on your ...
