# What are the energy storage power stations in Liberia

#### **Overview**

Liberia, a developing nation, faces significant challenges in its energy sector, with limited access to electricity and heavy reliance on traditional biomass and imported fossil fuels. This review explores Liberia.

What are the main energy sources in Liberia?

The primary energy sources in Liberia are traditional biomass fuels such as firewood and charcoal, which account for more than  $80\,\%$  of the country's total energy consumption [5, 12, 13]. Petroleum products, including gasoline and diesel, account for about  $10\,\%$  of energy consumption, while hydroelectric power accounts for just over  $6\,\%$ .

How can Liberia expand energy access?

These resources hold immense potential, with Liberia boasting abundant solar irradiation and promising bioenergy in specific regions. Efforts to expand energy access also hinge on vital factors such as international partnerships, public-private collaborations, and innovative off-grid and mini-grid solutions.

How will Liberia achieve universal access to electricity by 2030?

The country will need to invest heavily in energy infrastructure to achieve universal access to electricity by 2030. The primary energy sources in Liberia are traditional biomass fuels such as firewood and charcoal, which account for more than 80 % of the country's total energy consumption [5, 12, 13].

Why are thermal power plants important in Liberia?

Thermal power plants have been important to Liberia's electricity generation infrastructure. These plants utilize heavy fuel oil (HFO), diesel, or other liquid fuels as their primary energy source to produce electricity. The reliance on imported fuels for thermal power generation poses several challenges for Liberia [6, 17].

How can Liberia reduce its dependency on imported fuels?

To overcome these challenges, Liberia has been exploring alternative

solutions to reduce its dependency on imported fuels for thermal power generation. One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation.

Will Liberia get a 20 MW power supply in 2020?

In addition, the government signed a Power Purchase Agreement with a solar energy company to provide the country ≥20 MW of electricity in 2020 . Despite these efforts, much work remains to be done to improve access to reliable and affordable energy in Liberia.
