What is the Guatemala Power Plant

Overview

How many power plants are in Guatemala?

Guatemala has 69 utility-scale power plants in operation, with a total capacity of 3421.5 MW. This data is a derivitive set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

How many geothermal plants are there in Guatemala?

Two geothermal-powered plants in particular were installed: Calderas (5MW) in 1998, and Zunil (24MW) in 1999. Guatemala has many natural reserves of both oil and gas, yet both are under-utilized. There exist approximately 153 oil wells, however only 58 are currently utilized for oil production.

How much energy does Guatemala use?

For example; out of possible 5000MW hydroelectric power potential, Guatemala uses only 853 MW (17.06%), and of 1000MW potential of geothermal energy, the country uses just 49.2MW (4.92%). Guatemalan total energy production reached approximately 9.6Mtoe by the year 2016.

Can geothermal power be used in Guatemala?

The Guatemalan government has a plan of using geothermal power to supply for two thirds of the country's energy needs by 2022. Thus reducing oil imports and stabilizing the country's energy supply. Crude oil production in Guatemala has high potential, with estimations suggesting the possibility of reaching 50000 barrels/day.

Does Guatemala produce natural gas?

The country produces 1,162bbl/day of refined petroleum products. Guatemala does not produce any natural gas. Guatemala consumed 89,000 bbl/day as of 2016 of refined petroleum products. Oil and gas is imported primarily from the United States and Mexico.

Does Guatemala have oil & gas?

Guatemala has many natural reserves of both oil and gas , yet both are underutilized. There exist approximately 153 oil wells, however only 58 are currently utilized for oil production . The country has an enormous hydrocarbon potential .
