Do smart devices need an uninterruptible power supply (UPS)?

Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in.

Do you need an uninterruptible power supply?

To protect your likely expensive investment, an uninterruptible power supply is integral. This applies especially to areas that suffer from frequent power outages, particularly rural areas, extreme climates, or places with bad power grids. In order to buy the right UPS, however, you'll need to make sure that some basic requirements are met.
