## Will China s nuclear power participate in the construction of 5G base stations

#### **Overview**

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Why is 5G a good choice for a nuclear power plant?

At present, 5G wireless communication networks have become the standard infrastructure for new and ongoing nuclear power plants, and are an important carrier network for subsequent intelligent business construction. They have played a strong supporting role in intelligent operation and industrial internet. Yuefeng Shen.

What will China do with the 5G push?

Alongside the 5G push, China will also start trials for 10-gigabit optical networks and optimize computing power centers amid an artificial intelligence (AI) boom brought on by ChatGPT.

Can China build a nuclear power station?

As the world's biggest builder of nuclear power stations, Chinese state-owned companies are obvious candidates. The country currently operates 24 nuclear reactors with a further 25 under construction. A deal with the UK could work well for China, explains Thomas, because the country wants to export its nuclear technology to the West.

Does China have a 5G network?

Wen Ku, director-general of the China Communications Standards Association, highlighted the nation's progress in telecommunications, stating, "China has made remarkable strides in 5G infrastructure, which gives it an unparalleled edge in exploring 6G technologies.".

#### Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

#### Will China s nuclear power participate in the construction of 5G bas

#### 5G, 6G at 'forefront' for high-quality ...

Mar 14, 2023 · The country has built more than 2.54 million 5G base stations, with the number of 5G smartphone users surpassing 575 million," said Jin ...

## Shenzhen Promotes 5G Base Station Energy ...

Jan 4, 2023 · The backup energy storage of 5G base stations is usually idle, and it can be aggregated to participate in power grid dispatching by connecting to
